BUT OTHERWISE LOCAL TRADE IS IN GOOD CONDITION.

Prices Steady and Firm and in Some Cases Too High-Grain Markets Are Strong but Light.

In the week ended on April 12 trade hardly reached expectations, the latter part of the week being too cool to give snap to however, trade assumed summer-like volurae, the only drawback being the high range of prices still prevailing in some lines, Irish potatoes, sweet potatoes, cabbage, apples all being so high as to preclude their use as much as desired. Oranges and bananas are selling at reasonable a small percentage of the lines of articles which furnish the table, is very reasonable. Maple syrup comes in slowly and is firm in price. In the produce line high prices are the rule. Seldom are eggs selling in April at 13 cents a dozen at wholesale, with butter, if choice, bringing 20 cents a pound and poultry proportionately high. While a good thing for the seller it is hard on the buyer, as eggs are in good request to take the place of fresh meats to some extent. In staple groceries steady, firm prices are the feature, and on but few lines of goods are prices really high, other markets being duly considered. The flour and grocery markets are in very satisfactory shape for the buyer. In dry goods there is an advancing tendency to prices, and this stimulates trade despite weather conditions. The seed market is less active, with prices practically the same. The cool with prices practically the same. Reports received from the Southwest, however, stated that wheat was not improving with the rains, the subsoil being so dry that such moisture as had been supplied since spring had disappeared without affording the necessary relief to vegetation. The bullishly inclined at once seized on these reports, and, with the remarkable strength in corn, pushed prices up 1c from low mark. Acceptances abroad over night were moderately good. > Architect Clarence Martindale has completed plans for the plant of the French Piano Company that will be built at New Castle. It is said that this plant will be the largest of its kind in the world. The structure will be in the form of a "V, 1,000 feet long, 400 feet on one side and 300 feet on the other, with a broad front and rear of sixty feet. The building will be constructed of slow burning brick. The company will employ 900 men. The plant was formerly located at Springfield. O., and was recently burned.

The Indiana Trust Company yesterday sold four lots with a frontage of 160 feet and depth of ninety-seven feet, located in Bobbs's addition on Mick street, to the National Dry Kiln Company for a consideration of \$1,120. The property adjoins the Hamilton-Dynes lumber yard. The company will immediately erect a factory that will give a large number of men employ-

D. M. Parry yesterday purchased twenty-three acres of land between the Country Club and Riverside Park of Francis Smith, and will use the grounds for a summer home. Mr. Parry already held considerable property in that immediate vicinity, and this gives him a summer place of many acres. The A. J. Meyer & Co. agency has sold the large residence of Rudolph Rupert at property at 1706 Bellefontaine street was sold to Della Wright for \$3,000 cash. The real estate and insurance departments of the Union Trust Company will move into their new quarters at 116 East Market street to-morrow. The banking department will take the room vacated at of the present quarters at 116 and 118. The work of erecting the new building in the rear and the alterations of the old building are nearly completed. The sum of \$25,000 was expended in making the improvements. The Stevenson agency yesterday sold the lot of Margaret Coulter, on North New roymson for \$3,000. The lot has a frontage of forty feet and a depth of 150 feet. The agency also sold a lot for Fred Cline, located on New Jersey street, between Twelfth and Thirteenth streets, of the same dimensions, to Lewis Efroymson for \$3,100. John N. BUILDING OPERATIONS.

Figures Secured from Fifteen of the Large Cities.

An advance proof of Construction News showing building operations in fifteen large "Fifteen of the largest cities in the United States displayed increased activity in their

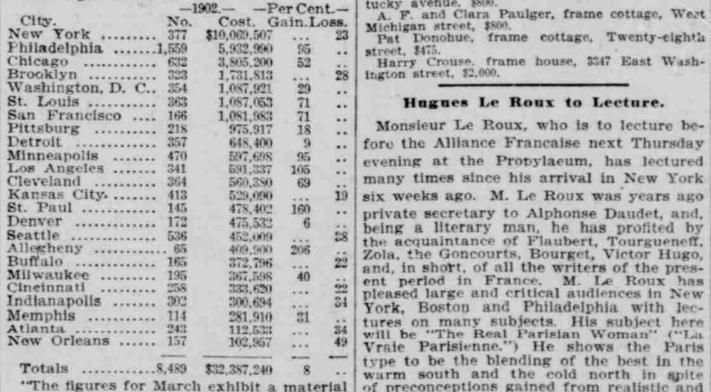

various building departments for the month of March, 1902, over the same period last year. Nine other municipalities exhibit losses. However, the sum total shows a "Statistics specially compiled for Construction News tells this story: Last month there were 8,489 permits issued in the build-

ing departments of twenty-four cities. These improvements called for an expenditure of the sum of \$32,387,240. In March, 1901, the operations aggregated 7.605 buildings at a cost of \$29,796,329—an increase of 884 permits for last month over the figures of a year ago, and of \$2,590,911 in their cost, or a general gain of 8 per cent. "Reports from the Pacific coast, with the exception of Seattle, indicate that the building boom recently started there will continue indefinitely. San Francisco authorities say that numerous ambitious proj-

ects are under way and contemplated. Los Angeles is maintaining the pace it set a year ago and the improvements there are all of an exceedingly stable nature. Seattle's flop into the 'lost and found' column is attributable to a strike. "Word comes from Minneapolis that last month's building record surpassed all previous marks for a period of ten years. New York easily occupies the premier position in the table below, with \$10,069,507 to its credit.

SITUATION ENCOURAGING.

The Transfers for the Week Aggregated \$291,852.72. Real estate men feel highly encouraged

over the week's business and predict a record year. There were 170 transfers during the week, representing an aggregate consideration of \$291,852.72. The outlook for a brisk market is better than at any other time in former years and business will be heavy. A marked evidence of the progress of the market and a feature which assures stimulating prices and a large number of sales is the platting of lots in almost every direction adjoining the city. All of the land between the city and Broad Ripple has been platted, and there have been large additions added to the city on the east, west and south. Many real estate men are now making the platting and sale of new additions a feature, and some are devoting their entire time to it. The plan of selling lots and building houses on the installment plan has encouraged many to buy, especially persons in moderate circumstances.

President Butler Against Dancing. Yesterday at chapel hour in Butler College President Scot Butler criticised the management of the Athletic Association for announcing a "reception" to be given to-morrow evening at Brenneke's Academy. President Butler took occasion to proclaim the position of college presidents on the question of dancing. He said the affair was arranged unofficially and entirely without the knowledge and consent of the faculty committee on athletics, and it must not be given as a college event. The action of President Butler was a surprise to many of the students, but there were a few who applauded his remarks. It was decided later by Manager Hunt to give the dance

Several Cars Wrecked.

A serious freight wreck occurred yesterday afternoon on the tracks of the Peoria division of the Big Four about two blocks west of White river. The rails spread, sending several cars half way down a steep embankment. The cars were wrecked, but fortunately none of the train crew was hurt. The train consisted of a switch engine and a number of empty box and flat cars and also several loaded cars. It was several hours before the wreckage was cleared from the tracks, but there was little delay in other traffic. The line is traveled daily by eight passenger trains of the L. D. & W. and Big Four roads, and it was fortunate the break did not happen when any of these trains were passing, as they run at a high speed at this point.
